Sketches the outlines of France and the course of the river with its tributaries, before presenting its source in the Pyrenees whose peaks we see as we descend close to the torrent thru gorges and ravines. At Toulouse we see the results of floods; at Agen, its low waters; at Castet the river is joined by a lateral canal. Then thru the barren country to Bordeaux with its usual maritime activities. The joining of the Dordogne to the Garonne to form la Gironde at the end of its course concludes the rivers' story

Within the boundaries of the 'Italian boot' is a country of unusual geography. The cool climate of the north, the Mediteranean climate of the south, the twin coastlines, the 'backbone' of mountain ranges have helped to produce different types of agriculture and living patterns. We meet a silk factory worker in Milan, a rice farmer in the Po Valley, a high school student in Rome and a citrus fruit grower near Naples

A young Mexican doctor goes to serve his internship in the tiny rural village of Zinacanton, Mexico. For weeks the doctor battled the ancient suspicions and prejudices which still exist in many parts of Mexico. Modern science was not for these people—their faith lay in the village witch doctor's herbs and chants. Even the support of the local padre was not sufficient to gain a foothold for the young doctor. However the village and even the witch doctor were finally won over to the beliefs of science by the use of serum to save a child bitten by a scorpion

Serves as a field trip to introduce students to the history, geology and outstanding life forms of the park. For the elementary grades it is vital geography and science—mountain structures, glaciers, lake formation, wild animals and unusual flowers. For secondary and collegiate levels the film also illustrates basic geologic concepts

Extensive use has been made of animation to portray graphically the development of land contours and the effect that glaciers had in creating present day geological formations.

Geographic concept: A tropical land, its fertility constantly replenished by volcanic ash, provides abundantly for a large population

Here is great wealth in oil, rubber, teak, quinine and the soil itself because it is constantly enriched and renewed by volcanic ash. The story is focused upon four men of a train crew. Their route is from coastal plain to mountain slope—from urban to rural scenes—from people employed in industrial activities to simple farmers dependent upon the soil.

"This film emerges as a record of the present-day life of the inhabitants—inheritors of the remains of a vanished culture. Anthropological information is the burden of the commentary; the visuals and the music combine to create an impressionistic picture of relapse and decay which finds culminating poignance in a sequence depicting the island leper colony. A documentary report of intellectual starvation in countries scourged by Nazi occupation. Schools are now lost in the rubble of homes, hospitals and churches. Children gather knowledge of the world from the black markets and refuse dumps, roving in gangs thru the litter of a civilization. From mute faces eyes stare hungrily, marking the desolation of minds as well as bodies. The film suggests that it is here that a beginning must be made, that text books, writing materials, research equipment and a thousand other tools of knowledge are needed to break apathy and hostility and to open young minds to the promise of a more peaceful world

Deals with the decisive moment when the rift between the North and the South became final and irrevocable with the declaration of secession by Jefferson Davis in the United States Senate. The speech is preceded in this excerpt by incidents on the floor of the Senate which reflect the tensions and animosities besetting the nation. In his address, Davis expresses simply yet eloquently, the determination of the southern states to withdraw from the Union. His delivery and his words stress the difficulty of this decision and at the same time reveal the sincerity and conviction of Confederate leaders in their beliefs. The concluding scene depicts the pathos of the occasion as southern senators file resolutely from the Senate chamber

HOW TO OBTAIN FILMS

The H. W. Wilson Company, publisher of this volume, does not sell or loan films.

There is no standard pattern of film distribution. Therefore, it is necessary that a film user be familiar with the main sources which are listed in the Educational Film Guide, and also know the film libraries which serve his state and city.

Main Source. The main source, which is indicated in the Educational Film Guide, is responsible for the distribution of the film in the United States. Often the film can be borrowed or purchased directly from this main source or its nearest branch. When the main source cannot provide the film directly to the borrower, the main source will tell him where it may be obtained. In some cases, the film will be available from both the main source and local film libraries.

Local Film Libraries. Film libraries are maintained by state university extension departments, public libraries, independent audio-visual dealers, and many other types of agencies. A useful and inexpensive directory, arranged by state and city, may be purchased from the U.S. Government Printing Office, Washington, D.C. Addresses of independent audio-visual dealers appear in this directory and may also be obtained from the headquarters of the National Audio-Visual Association, 2540 Eastwood Avenue, Evanston, Illinois. To save time and postage, it is advisable to obtain a film from the nearest possible source.

Free Films. No charge except postage is made for the use of several thousand films marked "free-loan" in the Educational Film Guide. These films can be obtained from the main source or its nearest branch office. In some cases the main source will have deposited prints in local film libraries, and may refer the borrower to the nearest depository.

DIRECTORY OF MAIN SOURCES

This directory contains only the sources which have films listed in this book. It is keyed to the abbreviation which follows the title of the film in Part 2, the Classified Subject List.
